

VISION AND STRATEGY

OUR VISION

Excellent science reveals the secrets of the failing heart

www.iemr.no

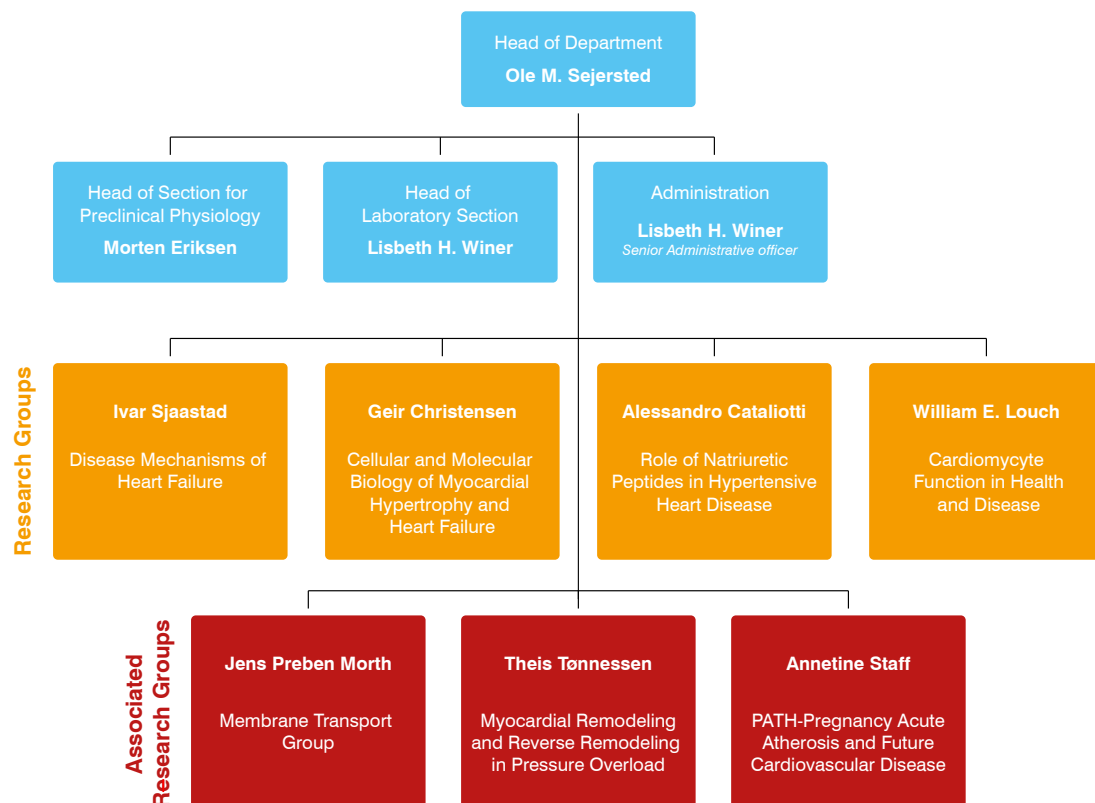

OUR AIMS

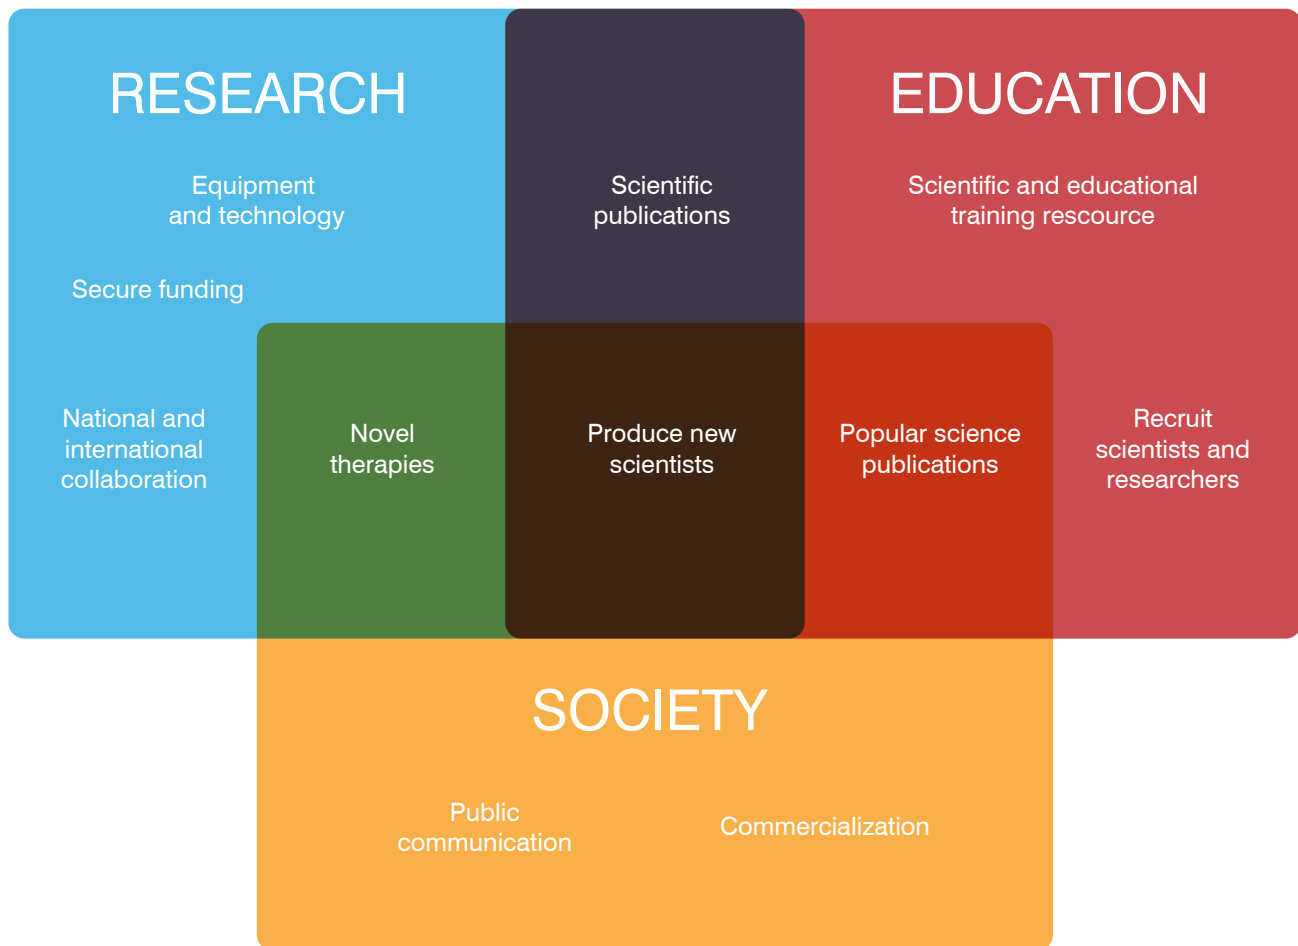

Develop and employ state-of-the-art technologies to understand the mechanisms of heart failure

Find novel targets for the treatment of heart failure patients

Recruit and educate PhD and medical students to become tomorrow's scientific experts

INSTITUTE FOR EXPERIMENTAL MEDICAL RESEARCH

OUR STRATEGIES

Recruit scientists and researchers

Recruit and retain talented, competent people and foster their development.

Equipment and technology

Maintain instruments, laboratories and competence to serve scientists in the hospital and the health region with comparative medicine resources.

Scientific and educational training resource

Offer modern surgery and intervention facilities for clinical training.

Produce new scientists

Provide excellent academic and research training for PhD, medical, and masters level students. We aim to promote honest and ethical behavior within science and professional relations.

Secure funding

Seek competitive grants to sustain world-class research.

National and international collaboration

Strengthen national and international collaboration with leading researchers to access required technology and competence.

Scientific publications

Publish research findings in high-impact journals, and present results at national and international meetings.

Novel therapies

Improve prevention, diagnosis and treatment of cardiovascular disease by unraveling disease mechanisms.

Commercialization

Identify important findings and protect intellectual property by patenting innovations.

Communication

Communicate important research findings to the general public through lectures and popular science publications.
